GENERAL ECONOMIC TABLES

OF THE INDIAN ADMINISTRATIVE SERVICE

Superintendent of Census Operations, Rajasthan

PREFACE

In this book are presented the first four of the nine general economic tables of the Census 1961. The rest are published separately as the second part. This part provides the statistics on the characteristics of the economically active and inactive population of the state. The data presents its distribution by age, sex education, industry and status. When considered alongside the data of national accounts—national income or gross national products—this will reveal much more about the secular changes occurring in the State than what could be obtained by any one of them separately. The information, presented here for the first time, would be found useful for the formulation of programmes of economic and social development and also for assessing the social position of our population.

I am grateful to Shri Asok Mitra, Registrar General, India, his Deputy Shri D. Natarajan and the Central Tabulation Officer Shri K. D. Ballal for their guidance. I thank Dr. U. B. Mathur, Deputy Superintendent, Census Operations, Rajasthan, who has assisted me in this work. My thanks are also due to Shri P. S. Ramachandran, Manager and Shri N. K. Mudaliar, Assistant Manager (Technical) Government of India Press Simla for the great interest they have taken in the printing of this book.

INTRODUCTION

Different systems of economic classification of population have been used in the Indian censuses. In 1901 the population was divided into eight classes of occupations viz., (1) Government (2) Pasture and Agriculture (3) Personal services (4) Preparation and supply of material substances (5) Commerce, transport or storage (6) Professions (7) Unskilled labour, not agricultural and (8) Means of subsistence independent of occupations. These classes were further divided into 24 orders, 79 sub-orders and 520 groups. Under each occupational group the number of actual workers and dependants was given. The number of persons who are partially agriculturists in addition to the main occupations was also mentioned.

In the censuses of 1911 and 1921 the occupational classification was done on a system devised by Bertillon and consisted of four classes only viz., (1) Production of raw materials (2) Preparation and supply of material substances (3) Public Administration and liberal arts and (4) Miscellaneous. There were 12 sub-classes in both the censuses. The number of orders and groups, however, was 55 and 169 respectively in 1911 while it was 66 and 191 in 1921. The number of actual workers, partial agriculturists among them, and, the number of dependants was given for each occupational group in these censuses as done in 1901.

It may be noted that in the censuses of 1901, 1911 and 1921 the term 'actual worker' was defined to include all persons who actually do work or carry on business whether personally or by means of servants or who live on house-rent, pension etc. All other persons were treated dependants.

In 1931, 'actual workers' referred to 'earners' only i.e., those who earned in cash or kind. The dependants were also classified as 'Working dependants' and 'Non-earning dependants'. In the former category were included those persons who had an occupation but did not receive any income in cash or kind while in the latter, persons who did not work or had no occupation were included. The working population was divided in the same way as in 1911 and 1921, sub-divided into 12 sub-classes, 55 orders and 193 groups. Under each class sub-totals of persons following the occupations as 'Principal occupation' or as 'Working dependant' or as 'Subsidiary to other occupations' were given.

In 1941, the general scheme of classification followed the 1931 with a few minor alterations only, in so far as the total number of groups was raised to 235.

In 1951, the Indian Census Economic Classification Scheme was adopted. It was based on the 1931 classification scheme of occupations. A few modifications were, however, introduced and a comprehensive economic classification of the population as a whole was made. The population was divided into two broad categories—Agricultural and Non-agricultural and each of these were further sub-divided into four classes. The Agricultural population including their dependants, was divided as (1) Cultivators of land, wholly or mainly owned (2) Cultivators of land, wholly or mainly unowned (3) Cultivating labourers, and, (4) Non-cultivating owners of land; agricultural rent receivers. The Non-agricultural classes including their dependants were sub-divided into persons who derived their principal means of livelihood from (1) Production other than cultivation (2) Commerce (3) Transport and (4) Other services and miscellaneous services. These eight livelihood classes were further sub-divided into (i) self-supporting persons (ii) non-earning dependants and (iii) earning dependants. There were 10 divisions, 88 sub-divisions and 163 groups of industries and services. It may be noted that all the economically active as well as inactive persons were lumped together under each livelihood class on which they were mainly dependant. The economic classification, on which the categories adopted in 1951 were based, was thus neither purely industrial nor occupational but a combination of both.

In 1961 the working population has been separated from the non-working population and the workers have been presented under nine broad-categories, based on the Standard Industrial Classification (reproduced as Annexure I at the end of this book), viz :—

- | | |
|------------------------|-------------------------------|
| 1. Cultivation | } Corresponding to Division D |
| 2. Agricultural labour | |

3. Mining, quarrying, livestock, forestry, fishing, hunting and plantations, orchards and allied activities, corresponding to Divisions 0 & 1.
4. Household industry, corresponding to Divisions 0, 1 and 2 & 3.
5. Manufacturing other than household industry corresponding to Divisions 2 & 3.
6. Construction, corresponding to Division 4.
7. Trade and Commerce, corresponding to Division 6.
8. Transport, storage and communications, corresponding to Division 7.
9. Other services, corresponding to Divisions 5, 8 & 9.

It may be noted that the Standard Industrial Classification consists of 9 divisions, 45 major groups and 343 minor groups.

It would thus be seen that the economic classification schemes have not been identical from census to census. This is because that the Census Organisation has always aimed at dynamic comparability between one census and the other resulting from the changing economy of the country and has not been bound to the idea of maintaining the stagnant identity. When it was realised by those engaged in the task of planning for the country that the information available on the basis of the schemes of economic classification adopted in 1951 was difficult to use and that the concept of self-supporting persons, earning dependants and non-earning dependants was defective in so far as it was much too susceptible of subjective variation which was responsible for rather violent fluctuations in the estimates of unpaid family workers, particularly females even in contiguous culturally homogeneous regions, the 1961 Census did not hesitate to change the classification and concepts of 1951 to suit the changing needs of the country. It boldly gave up the concept of dependency and livelihood in its economic classification and adopted the concept of work for the production of goods and services, and the two fold classification of the National Classification of Occupations and Standard Industrial Classification for the greater differentiation of personal skills and impersonal sectors of production and services and thus started a series for the future yet maintaining comparability with the past.

The following general economic tables have been made :—

Table B-I	Workers and Non-workers, classified by sex and broad age-groups.
Table B-II	Workers and Non-workers in cities and towns arranged territorially classified by sex and broad age-groups.
Table B-III	Industrial classification of Workers and Non-workers by educational levels.
Table B-IV	Industrial classification by sex and class of worker of persons at work (A) At Household Industry, (B) In non-household industry, trade, business, profession or service, (C) Industrial classification by sex and Divisions, Major Groups and Minor Groups of persons at work other than cultivation.
Table B-V	Occupational classification by sex of persons at work other than cultivation.
Table B-VI	Occupational divisions of persons at work other than cultivation classified by sex, broad age-groups and educational levels in urban areas only.
Table B-VII	Part A—Persons working principally (i) as Cultivators, (ii) as Agricultural Labourers or (iii) at Household Industry classified by sex and secondary work (i) at Household industry, (ii) as Cultivator or (iii) as Agricultural Labourer. Part B—Industrial classification by sex of persons working in non-household industry, trade, business, profession or service, who are also engaged in household industry.
Table B-VIII	Part A—Persons unemployed aged 15 and above by sex, broad age-groups and educational levels in urban areas only. Part B—Persons unemployed aged 15 and above by sex and educational levels in rural areas only.
Table B-IX	Persons not at work classified by sex, broad age-groups and type of activity.

In view of the fact that these tables occupy a large number of pages all of them could not be published together in a single book and have been published in two parts, Part II B (i) the present volume covering tables B-I to B-IV, and Part II B (ii) which contains tables B-V to B-IX.

The tables covered by this volume, reflect the different economic characteristics of the general population. These tables were built up from the replies to the various questions asked by the census enumerator. The questions put to the persons enumerated and the instructions to the enumerators pertaining to the filling up of answers to these questions have been given at the end of this note for the general appreciation of the readers.

For the facility of the readers who might like to draw comparisons between the figures as presented in 1961 and those of earlier censuses, a correlating statement has been prepared and is included as an Annexure II at the end of this book. The statement indicates the groups and sub-divisions adopted at each of the previous censuses as corresponding to the broad categories of the 1961 Census.

Before we close this note, certain points relating to Table B-III Part A may be noted. There are some unusually large figures under 'others' below the educational level—Technical Degree or Diploma equal to Degree or Post Graduate Degree. This has resulted due to the inclusion of persons holding degrees like B.Sc. and M.Sc. in general science subjects which were taken as technical degrees as there was no other educational level specified for this purpose.

In some districts persons having degrees in certain subjects have not been returned. A plausible reason for this may be that either such persons were not present during the enumeration or they were not correctly returned by the enumerator.

The number of persons with degrees in Engineering according to this table and in the occupational figures of engineers (Group 00) as shown in Table B-V for urban areas differ to a large extent. The recent expansion in developmental activities and dearth of qualified personnel has resulted in the employment of persons having only diploma qualifications as engineers and hence the figures shown in Table B-V are in excess.

ECONOMIC QUESTIONS OF CENSUS 1961

AND

INSTRUCTIONS TO THE ENUMERATOR

The questions 8 to 11 apply only to workers. A person who is at work may be working as a Cultivator, as an Agricultural Labourer, at a Household Industry or may be doing any other work. You have to record the answer in question 8, 9, 10 and 11 according as the person is working as a Cultivator or as an Agricultural Labourer or at Household Industry or doing any other work. He may be engaged in only one of the above four categories or in more than one. Thus, a person can be working both as Cultivator and an Agricultural Labourer, in which case he should be entered both in Q. 8 and Q. 9, or, he may be working both as Cultivator and at Household Industry in which case he will be entered in Q. 8 and Q. 10, or, he may be working in any possible combination of 8, 9, 10 and 11, in which case he will be entered in the appropriate places, or, he may be doing just one kind of work in which case he will be entered in only one of the four Questions 8 to 11.

The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you visited the household. If on the check or revisional round such a person is found to be unemployed no change in the original entry should be made. A person who is working but was absent from his work during the fifteen days preceding the day on which enumerated or even exceeding the period of fifteen days due to illness or other causes should be treated as worker. A person who has been offered work but has not actually joined should be treated as non-worker. Work includes not only actual work but effective supervision and direction of work.

Persons under training as apprentices with or without stipend or wages will be regarded as working.

An adult woman who is engaged in household duties but doing no other productive work to augment the family's resources should not be considered as working for purposes of this question. If, however, in

addition to her household work she engages herself in work such as rice pounding for sale or wages, or in domestic services for wages for others or minding cattle or selling firewood or making and selling crowding cakes or grass etc., or any such work she should be treated as a worker.

Persons like beggars, pensioners, agricultural or non-agricultural royalty, rent or dividend receivers, who may be earning an income but who are not participating in any productive work should not be treated as working unless they also work in cultivation, industry, trade, profession, business or commerce.

A public or social service worker who is actively engaged in public service activity or a political worker who is also actively engaged in furthering the political activity of his party will be regarded as worker and entered fully in Q. 11.

Q. 8 WORKING AS CULTIVATOR

For purposes of the census a person is working as cultivator if he or she is engaged either as an employer, single worker or family worker in (a) cultivation of land or supervision or direction of cultivation of land owned or held from Government and (b) cultivation of land held from private persons or institutions for payment of money, kind or share.

Cultivation involves ploughing, sowing and harvesting and does not include fruit growing or keeping orchards or groves or working for plantations etc. Persons engaged in fruit growing or orchardry or plantations like tea, coffee, rubber, cinchona and other medicinal plantations should be entered in Q. 10 or Q. 11 as the case may be.

A person who has given out his land to another person or persons for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, will not be treated as working as cultivator. Similarly, a person working in another person's land only as a labourer, and has no right or lease or contract on land on which he works, nor is responsible for taking decisions as to which crops to sow and when, of taking the risks of cultivation and is paid wages in cash, kind or share such as share of produce (Agricultural Labour) will not be treated as Cultivator in this question.

Q. 9 WORKING AS AGRICULTURAL LABOURER

The labourer should have no right or lease or contract on land on which he works, nor should he be responsible for taking decision as to which crops to sow and when, or taking the risks of cultivation. A share of the produce goes to him only as wages. He should have been working as Agricultural Labourer in the last or current cultivating season.

Q. 10 WORKING AT HOUSEHOLD INDUSTRY

A Household Industry is defined as an industry conducted by the head of the household himself and/or mainly members of the household at home or within the village in rural areas and only at home in urban areas. The industry should not be run on the scale of a registered factory. Thus, the main criterion for a Household Industry is the participation of one or more members of a household in rural areas. In the urban areas the industry should be confined to the house. You should carefully keep this in mind.

A Household Industry should relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as pleader or doctor or barber or waterman or astrologer.

A person though he may not be working in his own Household Industry may be working as a paid employee in another Household Industry. You should, therefore, enquire whether the person who is not working in his own Household Industry is working in any other Household Industry and if so, write the nature of the work done by him against question 10 (a) and the nature of the Household Industry against 10 (b).

A person who is working as a paid employee in another person's Household Industry should be recorded in 10 (c).

The following examples will illustrate how questions 10 (a) to 10 (c) should be filled up for persons at Household Industry:

(a) Nature of work	(b) Nature of Household Industry	(c) If Employee
1 Spinning Yarn	Spinning yarn in Ambar Charkha	..
2 Dyeing and printing yarn ..	Handloom weaving	..
3 Threshing and cleaning grain	Flour making Chakki	..
4 Labourer employed for crushing oil	Oil Ghani	Employee

(a) <i>Nature of work</i>	(b) <i>Nature of Household Industry</i>	(c) <i>If Employee</i>
5 Tempering and polishing implements ..	Blacksmithy making agricultural implements	..
6 Labourer employed for making and firing kiln.	Earthenware pottery	Employee
7 Throwing and Turning pottery ..	Earthenware pottery	..
8 Making wooden doors and windows	Carpentry	..
9 Filling gold ornaments with lac ..	Goldsmithy	..
10 Labourer working hosiery machine ..	Hosiery	Employee
11 Keeping accounts	Hosiery	..
12 Polishing and Scraping metal ..	Electroplating	..
13 Labourer employed for putting iron hoop on cartwheels	Cartwheel wright	Employee
14 Repairing of guns	Gunsmithy	..
15 Bee keeping	Production of honey	..
16 Tending cattle	Livestock raising	..

Q. 11 DOING WORK OTHER THAN 8, 9 OR 10

If a worker is not working as a cultivator or as an agricultural labourer or at any Household Industry write the actual work he is doing. If a person is working as a cultivator or as an agricultural labourer or at Household Industry and also does some other work (including dairying or livestock raising, orchard or plantation etc., as distinct from cultivation of crops) which does not relate to any of the above categories, write the other work he does in this question. If he is engaged in more than one work and neither of them relates to any of the three categories mentioned above write here the work on which he devotes more time.

Q. 11 (a) NATURE OF WORK

In the case of persons not working or who work only as cultivator or as Agricultural Labourer or at Household Industry no information is required to be filled up here. For other workers describe fully the nature of work done by the person himself. Full and precise information as to the nature of work done by the person should be given. At previous censuses much trouble has been caused by inadequate answers, and if you do not succeed in obtaining satisfactory information on the individual slips, you will be required to make a further visit for that purpose.

Q. 11 (b) INDUSTRY, BUSINESS, TRADE, PROFESSION OR SERVICE

In the case of a person who is working and the nature of whose own work has been recorded in Question 11(a), you should write here the nature of industry, business, trade, profession or service in which the person works.

As in the case of Question 11 (a), you should describe in detail the nature of industry, business, trade, profession or service in which the person works. Vague answers should be avoided. In the case of industries, the articles which are produced or serviced or repaired, should be given. If more than one article is produced, the chief article produced or serviced or repaired should be given. In the case of business or trade the principal article of trade should be described. In the case of service describe the nature of the service to which the person's work belongs. The description should be such that it would be possible to classify the establishment in which the person is working for purposes of industrial classification of the population.

As in Question 11 (a) no entry is required to be made about the persons not working or who work only as cultivator or as agricultural labourer or at Household Industry against 11 (b) and 11 (c). For the rest of the workers record the class viz., employer, employee, single worker or family worker.

Q. 11 (c) CLASS OF WORKER

An employer is a person who has to employ other persons in order to perform the work entered in Q. 11 (a). That is to say, such a person is not only responsible for his own personal work but also for giving work to others in the business mentioned in Q. 11 (a). But a person who employs domestic servants for household duties or has subordinates under him in an office where he is employed by others, is not an employer, even if he has the power to employ another person in his office on behalf of his own employer or employers.

An Employee is a person who usually works under some other person for salary or wages in cash or kind. There may be persons who are employed as managers, superintendents, agents, etc., and in that capacity employ or control other workers on behalf of their own employers. Such persons are only employees, as explained above, and should not be regarded as employers.

A Single worker for the purpose of Q. 11 (c) is a person who works by himself but not as Head of household in a Household Industry. He is not employed by any one else and in his turn does not employ anybody else not even members of his household except casually. This definition of a Single Worker will include a person who works in joint partnership with one or several persons hiring no employees, and also a member of a producers co-operatives should be recorded as 'Single Worker'.

A Family worker is a member who works, without receiving wages in cash or kind, in an industry, business or trade conducted mainly by members of the family and ordinarily does at least one hour of work everyday during the working season. For the purpose of the entire Q. 11 such an industry should be on a scale larger than what has been covered in 'Household Industry' in Q. 10 whether run at home or away from home in town or village and even away from village in rural area and should ordinarily be in the nature of a recognised partnership, joint stock company or registered factory. For the purpose of this definition members of a family may be drawn from beyond the limits of the household by ties of blood or marriage. The family worker may not be entitled to a share of the profits in the work of the business carried on either by the person or head of the household or other relative.

Members of the household who help solely in household duties should not be treated as family workers.

Q. 11 (d) NAME OF ESTABLISHMENT

Describe in detail against Q. 11 (d) the name of the factory, workshop, business house, company, shop, etc. If a person has no fixed place of work, write 'No fixed place of work'.

For a person for whom no entries have been made in Qs. 11 (a), 11 (b) and 11 (c) no entry is required to be recorded in this question also.

Q. 12 ACTIVITY, IF NOT WORKING

This question will apply to a person NOT working.

No entry is to be made here for a person who is working that is for whom you have recorded the work in any of the questions 8 to 11 above.

The following activities should be precisely recorded in the case of persons NOT working :

1. Full-time student or child attending school who does no other work, such as make articles at home for sale, nor even help part-time in his own family cultivation, industry, trade or business.
2. Persons engaged in unpaid home duties (like housewife or other adult female) who does no other work, such as make articles at home for sale or wages, nor help regularly even part-time in family cultivation, industry, trade or business.
3. Dependant, including an infant or child not attending school, a person permanently disabled from work because of illness or old age.
4. Retired person who is not employed again, rentier, person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independant means for securing which he does not have to work and who does no other work.
5. Beggar, vagrant or independent woman without indication of source of income and others of unspecified source of existence.
6. Convict in jail (an undertrial prisoner will be shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution.
7. Person who has not been employed before but is seeking employment for the first time.
8. Person employed before but now out of employment and seeking employment.

Explanation:—(i) If a person, who does not work, cannot be readily classified in any of the above categories, put him in category 5. A retired person who has taken up regular work again should not be entered in this question as he would have been entered for his new work in Questions 8 to 11.

(ii) A person who is not working but has been offered work which he has not joined should be included in items 5. He should not be included in items 7 or 8.

TABLE B-1

**WORKERS AND NON-WORKERS
CLASSIFIED BY SEX AND BROAD AGE-GROUPS**

NOTE ON TABLE B-I

This is a basic economic table prepared on the basis of the Primary Census Abstract. It recalls Union Table B-I of 1951, Imperial Table VIII parts I and II of 1941, Imperial Table X parts (i) and (ii) of 1931 and Imperial Table XVII of 1921. The table for the former censuses was based on the concept of 'dependency' which has been changed to that of 'workers' and 'non-workers' at the current census. Hence, the data in this table is not strictly comparable with the earlier censuses.

In this table the population has been divided into nine industrial categories of workers, based on Indian Standard Industrial Classification, and a separate category of non-workers [detailed classification of which are available in Table B-IX part II-B (ii)] further classified into sex and broad age-groups viz. 0-14, 15-34, 35-59, 60 and above. The classification of workers and non-workers by specific age-groups, is a special feature of 1961 census. The age-groups correspond to the different stages of life which have special significance with reference to capacity to work viz., children, young persons, middle aged and elderly persons.

The table presents information down to district for total, rural and urban areas separately.

TABLE B-II

**WORKERS AND NON-WORKERS IN CITIES AND TOWNS ARRANGED TERRITORIALY
CLASSIFIED BY SEX AND BROAD AGE-GROUPS**

NOTE ON TABLE B-II

This table is similar to Table B-I except that it has been prepared for the urban areas only, indicating information separately in respect of each town, arranged territorially. It recalls Union Table A-V of the 1951 census, except for the difference in the concept of 'dependency' and 'work' as already stated in the fly-leaf of Table B-I.

The following abbreviations have been used for the status of towns :

M=Municipality

C.B.=Cantonment Board

TABLE B-III

**INDUSTRIAL CLASSIFICATION OF WORKERS AND NON-WORKERS
BY EDUCATIONAL LEVELS**

NOTE ON TABLE B-III

This table compares to some extent with the Union Table D-VII of the 1951 Census. It has been compiled into two parts. Part A deals with urban population classified into 9 industrial categories of workers and a separate category of non-workers cross tabulated by literacy and various educational levels. Part B refers to rural population where educational levels have been confined only to two categories viz, Primary or Junior basic and Matriculation and above. It is an important table indicating employment of persons of different educational standards amongst the various categories of workers. The educational qualifications of available manpower can be assessed with the help of this table.
